Data Analytics :
Real Life Scenario

What is Data Analytics Process?

The data analytics process or framework is what drives the entire analysis cycle from asking the right business questions, to collecting, cleaning, analysing and visualizing insights powered by data.

This helps us in doing analysis in a structured way for upcoming case studies and examples. Data analytics is important because it helps business optimize their performances.

Data analytics techniques can reveal trends and metrics that would otherwise be lost in the mass of information. This information can then be used to optimize processes to increase the overall efficiency of a business or system.

Scenario

A group of friends plans a movie night and each member provides their movie genre preferences and ratings.
The group discovers a suprising overlap in preferences, leading to an unexpected and exciting movie choice that everyone is excited about.

Table of Contents

01 **Ask**
Communication with others.

02 **Prepare**
Orgainse data in structured dataset.

03 **Process**
Maintain data integrity.

04 **Analyze**
Sort and filter data. Make predictions and recommendations.

05 **Share**
Communicate to help others understand results.

06 **Act**
Make decisions. Apply your insights.

Ask

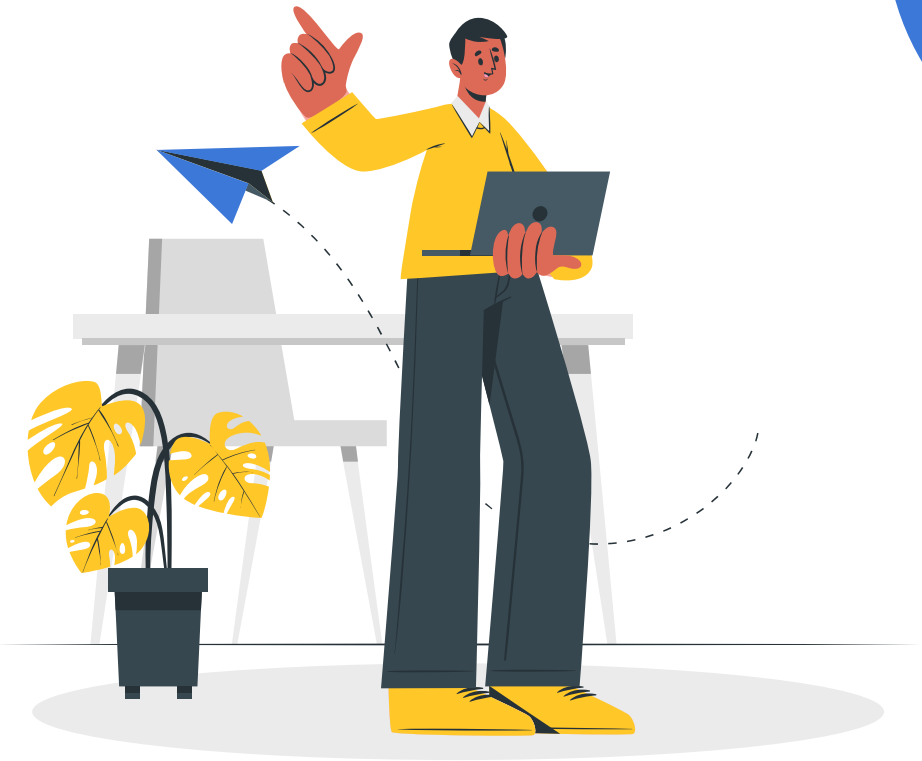
To select the best movie for a group movie night based on individual preferences. Gather movie genre preferences and ratings from each member of the genre.

Prepare

Each member provides their top three preferred movie genres and ratings for each genre. Organize the collected preferences into a structured dataset for analysis.

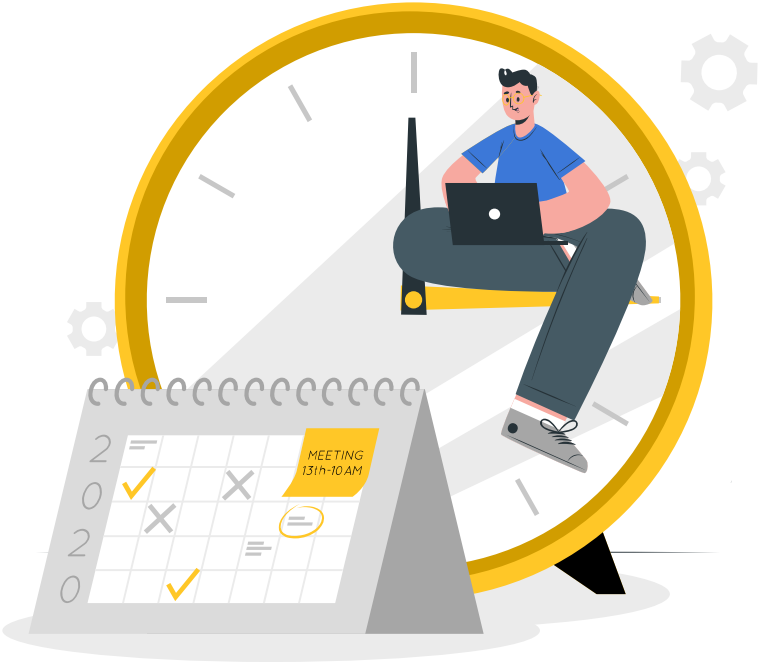
Process

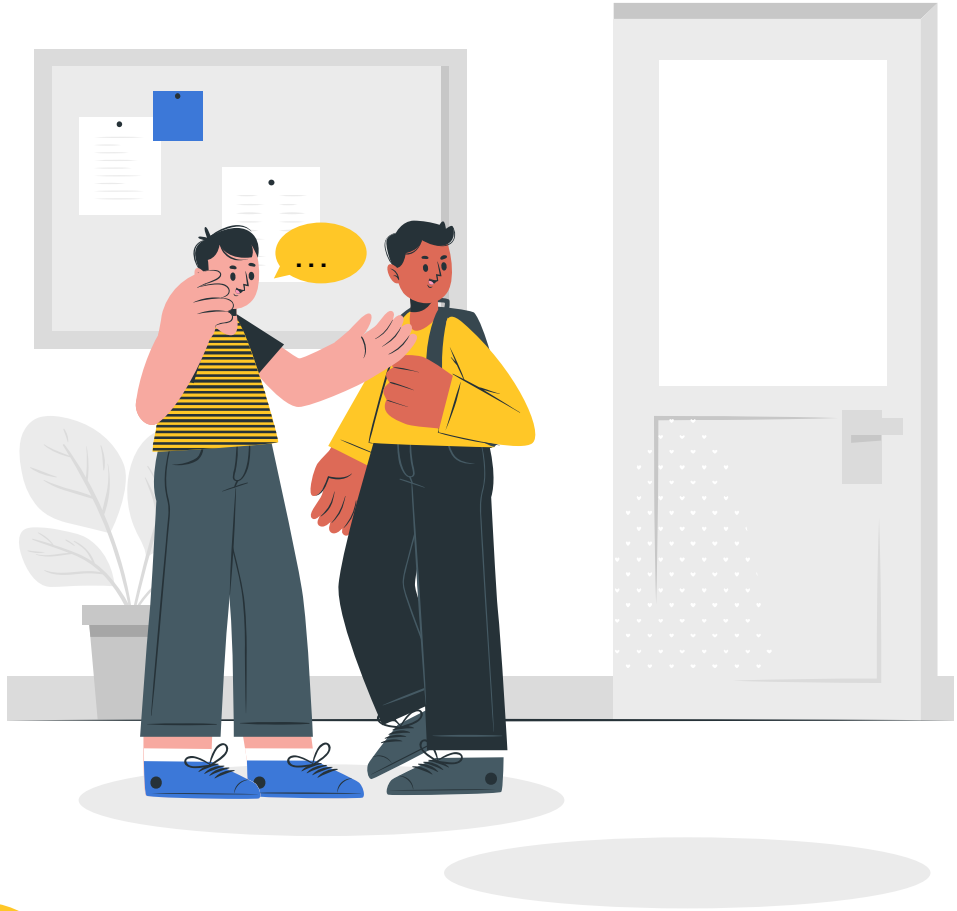
Assign weights to each genre based on the ratings provided by the group members. Calculate the weighted score for each movie based on the group's genre preferences. Rank the movie based on their weighted score to identify top choice.



Analyze

Present the top three choices with the highest weighted scores. Analyze the most preferred movie genres within the group.





Share

Share the top three movie choices and the data-driven selection process with the group. Engage in discussions about the movie choices and gather any additional feedback from the group.

Act

Based on the group’s discussions and preferences, finalize the movie selection for the movie night. Host the movie night and enjoy the chosen movie with the group.

Thank you
